Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

Applicant's election without traverse of claims 44-54 in the reply filed on September 20, 2005 is acknowledged. This application contains claim 1-43 & 55-65 drawn to an invention nonelected without traverse.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claims 44, 48-52 & 54 rejected under 35 U.S.C. 102(a) as being anticipated by Oshima et al. (US 2003/0105563) (published on June 5, 2003).

Oshima et al. disclose transporter comprising a body, wheel assemblies P1-P4 which rotate through 360 degrees and an onboard computer, wherein each wheel is independently steerable and driveable (col. 13, lns. 1-65), and having a rechargeable battery and recharging port.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 45-47 & 53 are rejected under 35 U.S.C. 103(a) as being unpatentable over Oshima et al. (US 2003/0105563) in view of Andrada Galan et al. (US 5,211,523).

1. Oshima et al. do not disclose a wireless communication system and a proximity sensor. Andrada Galan discloses a wireless communication system 37, 47 that issues instructions to a transporter and a proximity sensor. Andrada Galan et al. teach that for automatically guided vehicles signals from a proximity sensor 43 are processed to stop a vehicle 21 before crashing and continue the movement once the obstacle is removed. Therefore, it would have been obvious to one having ordinary skill in the art at the time the invention was made to modify Oshima's transporter to include a wireless communication system and proximity sensor, as per the teachings of Andrada Galan, such that a vehicle can automatically deliver goods while sensing objects within its path without manual intervention.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Gregory W. Adams whose telephone number is (571) 272-8101. The examiner can normally be reached on M-Th, 8:30-6.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Eileen Lillis can be reached on (571) 272-6928. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
